UNCOMPROMISING SAFETY FOR CLINICIANS AND PATIENTS

VANISHpoint™
IV CATHETER

The New Standard for Safety™

1

Perform venipuncture, observing for blood return. Advance the catheter slightly to assure full catheter entry into the vein.

2

Holding the flashback chamber stationary, disengage the hub from the introducer needle and advance the catheter into the vein.

3

Before withdrawing the introducer needle from the catheter, depress the color coded end of the needle housing to activate the automated retraction.

4

The introducer needle will retract into the housing. Dispose of the introducer needle in an appropriate sharps container.

the **VANISHPOINT**[®] **ADVANTAGE**

A safety IV catheter featuring
the patented VanishPoint[®]
automated retraction!

*VanishPoint[®] IV catheters are available
in a variety of lengths and gauges*

Push-off tab facilitates one handed advancement and indicates bevel orientation

Clear finger grips and flashback chamber allow for handling ease and flashback visualization

Sharp introducer needle for insertion ease and patient comfort

Color coded on both catheter hub and housing

Automatic needle retraction occurs with slight depression of the needle housing. Once activated, the needle is safely retracted into the housing, reducing the risk of needlestick injuries
